Light Switch the following signals from SD to HD on May 22nd at 10:00 AM EST.

When the timing is identified as a "LIGHT SWITCH", you need to provide the Shaw Broadcast help desk with the decoder UA number that you will be using for the signal in advance. If we do not have this information in advance you will have an outage with the signal until you provide the decoder UA to our help desk. The Light Switch does not occur as a soft switch.
