

## MPEG-4 EQUIPMENT UPDATE

November 23, 2017

### MPEG-4 SHAW DIRECT RECEIVERS, DISH & LNB'S

As we continue the transition to MPEG-4 we recognize that some BDUs would prefer to utilize Shaw Direct equipment in smaller systems. We are pleased to announce that this equipment is now available for sale by contacting your Shaw Broadcast Account Representative identified below.

#### What you need to know when using Shaw Direct equipment in your head end:

- With the co-location of ANIK F1R and ANIK G1 you can only use a residential Shaw Direct dish and LNB, commercial dishes will not work.
- The Shaw Direct Dish should be a minimum of 75 cm and the LNB needs to be an XKu LNB.
- The current map used for the older model Shaw Direct receivers will not work in this environment, we have created a new map.
- Depending on the current head end design or number of channels required, a Multi-switch may be required. If the current design has a Multi-switch then that Multi-switch can be re-used with the new dish and LNB.

To ensure that your head end set up works efficiently in this environment please contact your account representative with your current head end design. We will work with our technical support to recommend how to set up your head end with this new equipment.

#### Equipment Cost

Shaw Direct DSR 600	\$150
Shaw Direct Dish & LNB	\$100
Shaw Direct Dish	\$ 50
Shaw Direct LNB	\$ 50

*The above pricing includes shipping but excludes taxes.*

**Note: Shaw Direct receivers are intended for residential use. Shaw Broadcast recommends that BDUs use commercial receivers where possible.**
