

# QT Plus Solution

ARRIS set-top-box models compatible with the QT Plus platform include:

**DCX-3200; -3400; -3501; -3510**

Check the FAQ question "Which set-top boxes are compatible with QT Plus?" to find DCX versions that are **incompatible** with QT Plus systems.

*\*Remember, prior to purchase, consult ARRIS regarding phase compatibility for all set-top-boxes listed.*

*^To be used for transponders running over 38.8 Mbps.*

## Benefits:

- Economical solution to go completely digital and increase penetration
- Ability to stay competitive by providing High Definition & DVR
- Web-Ahead Pay-Per-View (WAPPV) access for set-top-boxes
